

## **ECE/COSC 402 Team Management Report and Plan**

Team: Team 30 - Design of a Program Visualizer for CS102 Students

Team Leader (sign): 

Date: 1-28-2015

### Objectives from Prior Report:

1. Meet with customer to discuss server/hosting and possible weekly meeting time
2. Assign individual tasks per roles
3. Begin req spec preparations (involves research and analysis)

### Accomplishments & Difficulties:

1. Setup consistent, brief meetings; everyone is contributing nicely as per their roles!
2. Papers have been well written and finished in a timely manner
3. Getting acquainted with Git

### Current Objectives:

1. Begin organizing and assigning code development
2. Finish reports
3. Meet with customer

### Assignments:

1. Kelley - update to-do list; ask customer about contacting python/java devs; MBOs to Git
2. Nash - create development plan; research and assign code pieces to everyone
3. Jonathan - research LDAP authentication
4. Patrick - finalize requirements
5. William - research code development
6. Grant - finalize societal impacts

### Concerns & Questions:

1. Best method for splitting up code and implementation
2. How to assign code development to each team member
3. Section 509: does it need to be included in our requirements?
